

# BEADED HOOP EARRINGS

## HOW TO

### SUPPLIES NEEDED:

Silver or Gold hoop earrings  
Craft Wire 26 gauge  
Size 10 beads - 2 colors  
Scissors  
Pliers  
Super Glue (optional)

1. First, cut one wingspan of craft wire, and then cut it in half.
2. After cutting the wire, use one piece of wire and wrap one end of that wire chosen around the top of your hoop five times as tight as you can and as close as you can to the top.
3. To start the beading process, you will add three of the first colors of beads. After adding the first three, add another three beads of the second of the second color. This will be the pattern throughout the remainder of the project.  
( 3 – first color, 3 – second color, 3 – first color, 3 – second color)  
As the project continues, be sure to keep the beads close together while wrapping them around the hoop.
4. Repeat **Step 2** until the wire fills up the hoop all the way around to the other side.
5. Once finished, wrap the excess wire around the end of the hoop five times and snip off any excess wire with pliers.
